

The world of Dissolvine[®] chelates

EDTA

General purpose chelating agent.

GLDA

Readily biodegradable chelating agent that can be used as alternative for NTA, EDTA, phosphates and phosphonates.

DTPA

Stronger chelating agent.

HEDTA

Chelating agent with similar efficacy to EDTA.

NTA

Readily biodegradable chelating agent that is not as strong as EDTA.

EDG

Readily biodegradable relatively weak chelating agent.

PDTA

Chelating agent especially developed for the photo-finishing process.

Glucuheptonate

Biodegradable chelating agent based on a carbohydrate.
