AkzoNobel Industrial Chemicals welcomed 2,800 visitors on Day of Chemistry

Around 2,800 people visited the Dutch locations of AkzoNobel Industrial Chemicals during the national Day of Chemistry on Saturday May 21. In Hengelo and Delfzijl the various production processes were explained and could be viewed. At both locations the visitors were very active with all kinds of lab testing, whereas at the Amersfoort office location lots of kids enjoyed the so-called Kids Lab where developing your own super glitter hair gel topped the day.
