Our results

at a glance

- Volume and price/mix development positive in all three Business Areas
- Revenue down 2 percent due to 5 percent adverse currency effects
- Restructuring costs €44 million (2013 €29 million). Excluding these, ROS% is 7.7 percent (2013: 7.1 percent)
- Operating income at €216 million (2013: €217 million) reflects adverse currencies and €15 million higher restructuring costs
- Net income attributable to shareholders €129 million increased (2013: €89 million), mainly due to lower financing expenses
- Adjusted EPS at €0.61 (2013: €0.51)
- Net cash outflow from operating activities was €552 million (2013: €406 million)
- On track to deliver 2015 targets despite expected continued fragile economic environment and volatile currencies in 2014

Financial highlights

Volume and price/mix development was positive in all three Business Areas. Revenue was down 2 percent, mainly due to divestments and 5 percent adverse currency effects. Operating income at €216 million (2013: €217 million) reflects adverse currencies and €15 million higher restructuring costs. Excluding restructuring costs, ROS% was 7.7 percent (2013: 7.1 percent). Cash outflow from operating activities was €552 million (2013: €406 million). As a consequence of de-risking our pension liabilities in the UK, other comprehensive income in shareholders' equity was adversely affected by €0.8 billion.

Revenue

- Volume in Decorative Paints was up compared with 2013. The market conditions in Europe remained challenging with lower volumes while volumes were higher in Asia. Revenue in Decorative Paints declined 6 percent due to a 6 percent adverse currency effect driven by Latin America and Asia and 4 percent from the divestment of Building Adhesives. Price/mix was positive in all three regions
- Volume in Performance Coatings was up compared with 2013. Revenue was 1 percent lower due to a 6 percent adverse currency effect
- Volume in Specialty Chemicals was higher compared with 2013 as a result of better market conditions in Functional Chemicals and the absence of the previous year's production issues, notably in Industrial Chemicals. Revenue declined, due to adverse currency developments and divestments

Divestments

- On October 1, 2013, the divestment of Building Adhesives was completed. This accounts for the divestment impact in Decorative Paints
- The divestment of the German stores in Decorative Paints was completed in Q1
- The divestment of the Primary Amides and Purate businesses was completed in Q4, 2013 and accounts for the divestment impact in Specialty Chemicals

Operating income

- Decorative Paints operating income for the quarter was lower than the previous year due to adverse currency effects and higher restructuring costs in mature markets
- In Performance Coatings, operating income was down 2 percent due to higher restructuring costs and adverse currency effects. Variability across individual businesses, and within regions, continued
- In Specialty Chemicals, profitability increased compared with 2013, despite currencies, due to better market conditions in Functional Chemicals and benefits from restructuring

Average raw material costs were slightly down on Q1 2013 and stable compared with 2013 exit prices.

Total restructuring charges amounted to €44 million (2013: €29 million). Excluding these, ROS% was 7.7 percent (2013: 7.1 percent). The majority of the restructuring charges related to Decorative Paints in Europe and Performance Coatings.

Operating income in other activities

Operating income in other activities was lower than the prior year due to costs incurred in respect of the de-risking of pension liabilities in the UK and non-recurring positive results in 2013 in insurance.

Following the successful delivery of the performance improvement project, on-going restructuring and continuous improvement costs are included in corporate costs. 2013 numbers have been restated accordingly.

Net financing expenses

Net financing expenses decreased by €26 million to €37 million, mainly due to lower financing expenses as a result of bond repayments and lower interest on provisions due to changed discount rates.

Tax

The Q1 effective tax rate is 23 percent (2013: 29 percent). The tax rate was positively impacted by an adjustment to previous years. Excluding this and other one-off factors, the tax rate is 29 percent.

Decorative Paints

- Volumes up due to strong volume development in Asia while market conditions in Europe and Latin America were challenging
- Revenue down 6 percent mainly due to adverse currency effects (6 percent) and divestments (4 percent)
- Operating income benefited from lower costs, but was adversely impacted by higher restructuring charges and currencies
- German stores divestment completed end of March

Volume in Decorative Paints was up compared with 2013. The market conditions in Europe remained challenging with lower volumes while volumes were higher in Asia. Revenue in Decorative Paints declined 6 percent due to a 6 percent adverse currency effect driven by Latin America and Asia and a 4 percent divestment effect. Price/mix was positive in all three regions.

Operating income for the quarter was lower than the previous year with higher restructuring costs in mature markets.

Europe

The combined effect of volume and price/mix in Europe was flat. Revenue was 8 percent lower, mainly due to the divestment of Building Adhesives. From a regional perspective, performance was mixed, with volumes declining in Western Europe and Southern Europe, while there was positive development in Eastern Europe. Restructuring measures and various operational efficiency improvement programs led to a lower cost base, but the ongoing restructuring spend meant that total operational costs were higher. As a result, operating income was lower than the previous year.

Latin America

Volume was down, however, revenue mostly declined due to adverse currency effects. Profitability increased due to lower fixed costs.

Asia

China and South East and South Asia had strong volume development. In China, volume and revenue continued to grow by double digits. Profitability continued to increase due to strong cost control.

Revenue development Q1 2014

■ Increase ■ Decrease

Performance Coatings

- Volumes up 3 percent compared with the previous year
- Revenue down 1 percent, mainly due to adverse currency effects (6 percent)
- Operating income down 2 percent due to higher restructuring charges and currencies
- Continuing focus on cost control and operating efficiencies

Volume in Performance Coatings was up compared with 2013. Revenue was lower due to adverse currency effects. Operating income was down 2 percent due to adverse currency effects and higher restructuring costs. Variability across individual businesses, and within regions, continued.

Marine and Protective Coatings

Volume was up, resulting in higher revenue despite adverse currency effects. Volume was up in Marine and Protective, but slightly down in Yacht. In Marine, the increase was driven by growth in deep sea maintenance, while in Protective Coatings, the volume improvement resulted from continued high activity levels in oil and gas.

Automotive and Aerospace Coatings

Revenue declined 3 percent due to adverse currencies and volumes, partially offset by favorable price/mix. In Vehicle Refinishes, volumes grew in Asia. Europe was stable, but there was a decline in the Americas, particularly in South America. Specialty Finishes and Aerospace were broadly flat.

Powder Coatings

Volume increases in all regions resulted in higher revenue, more than offsetting the adverse currency effects. The Transportation segment was strong across the regions. The closure of one of our Italian factories was completed at the end of the quarter.

Industrial Coatings

Revenue declined 4 percent due to currencies and lower volumes, partially offset by favorable price/mix. Overall volumes declined, with growth in Wood being more than offset by declines in Coil Coatings and Packaging. Volume growth in Asia was achieved in Coil and Packaging. Europe showed signs of recov-

ery in Wood and Coil. Two site closures were announced in Wood Americas.

Specialty Chemicals

- Volumes up 2 percent compared with the previous year
- Revenue down 2 percent, mainly due to adverse currency effects (4 percent)
- Operating income up by 36 percent at €135 million, despite currencies, due to cost control and operational efficiencies
- Continuous improvement measures continue in all businesses

Volume in Specialty Chemicals was higher compared with 2013 as a result of better market conditions in Functional Chemicals and the absence of the previous year's production issues, notably in Industrial Chemicals. Revenue declined, mainly due to adverse currency developments.

Profitability increased compared with 2013 due to better market conditions in Functional Chemicals and benefits from restructuring.

Functional Chemicals

Volume increased significantly, resulting in higher revenue despite adverse currency effects. Demand in Europe improved during the quarter. China achieved most of the growth in Asia, while North America was impacted by the severe winter weather.

Industrial Chemicals

Volume increased, mainly due to the absence of previous year's production issues. Enhanced capacity from the MCA plant in Taixing, China, also contributed to the increase. Margins were impacted by caustic price pressure.

Surface Chemistry

Volumes were impacted by the severe winter conditions in North America, which disrupted production and logistics. This, in addition to adverse currency effects, resulted in 3 percent lower revenue.

Pulp and Performance Chemicals

Volumes from bleaching chemicals in Asia and Brazil were strong, with weaker demand in Europe and North America. Revenue was down 7 percent, mainly due to adverse currency effects and divestments.

Shareholders' equity

Shareholders' equity decreased from €5.6 billion at year-end 2013 to €5.0 billion at the end of March 2014, mainly due to the net effect of:

- The de-risking of the pension liabilities in the UK, which had an effect on shareholders' equity of €0.8 billion
- Net income of €129 million

Dividend

Our dividend policy is to pay a stable to rising dividend. A final dividend for 2013 of €1.12 per share is proposed to the AGM, which would make a total 2013 dividend of €1.45 (2012: €1.45) per share. There will be a stock dividend option with cash dividend as default. Please refer to the last page of this report for dividend payment dates.

Invested capital

Invested capital at the end of Q1 2014 totaled €9.8 billion, up €0.5 billion on year-end 2013. Invested capital was primarily impacted by the seasonal increase of operating working capital of €0.4 billion.

Pensions

The funded status of the pension plans at the end of Q1 2014 was a deficit of €1.1 billion (year-end 2013: €0.6 billion).

The movement compared with year-end 2013 is primarily due to:

- De-risking the pension liabilities in the UK, giving rise to a loss of €0.8 billion which is recorded in other comprehensive income. More details of this transaction are provided in the press release of March 26, 2014 on our website
- Lower discount rates in all key countries

Offset by:

- Top-up payments of €297 million into certain UK defined benefit pension plans
- Asset returns above credits taken to the statement of income
- Lower inflation in the UK

Other effects of de-risking the pension liabilities in the UK were an increase of €58 million of the pension liabilities as well as a decrease of non-current financial assets by €715 million. The pension asset increased in Q1 2014 mostly as a consequence of top-up payments.

Workforce

At March 31, 2014, we employed 48,520 staff (year-end 2013: 49,560 employees). The net decrease was mainly due to:

- A decrease of 430 employees due to divestments
- A decrease of 440 employees due to ongoing restructuring

Cash flows and net debt

Operating activities in Q1 2014 resulted in a cash outflow of €552 million (2013: €406 million). The change is mainly due to higher seasonal cash outflows for working capital.

As a consequence of this cash outflow from operating activities and capital expenditures of €115 million, net debt increased from €1,529 million at year-end 2013 to €2,186 million at the end of Q1 2014.

During the quarter, a €825 million euro bond was repaid from existing resources, which further reduced borrowing costs.

Outlook and 2015 targets

We are on track to deliver the 2015 targets despite the expected continued fragile economic environment and continued volatile currencies in 2014.

Amsterdam, April 17, 2014
The Board of Management

Notes to the condensed financial statements

Accounting policies and restatements

This interim financial report is in compliance with IAS 34 "Interim Financial Reporting". This report is unaudited. As of January 2014, IFRS 10 "Consolidated Financial Statements" and IFRS 11 "Joint Arrangements" have been implemented, which had no impact on our consolidated financial statements. Otherwise the accounting principles are as applied in the 2013 financial statements.

Seasonality

Revenue and results in Decorative Paints are impacted by seasonal influences. Revenue and profitability tend to be higher in the second and third quarter of the year as weather conditions determine whether paints and coatings can be applied. In Performance Coatings, revenue and profitability vary with building patterns from original equipment manufacturers. In Specialty Chemicals, the Functional Chemicals and the Surface Chemistry businesses experience seasonal influences. Revenue and profitability are affected by developments in the agricultural season and tend to be higher in the first half of the year.

Other activities

In other activities, we report activities which are not allocated to a particular Business Area. Corporate costs are the unallocated costs of our head office and shared services center in the Netherlands. Pensions reflects pension costs after the elimination of interest cost (reported as financing expenses). Insurances are the results from our captive insurance companies. Other includes the cost of share-based compensation and company projects, the results of treasury and legacy operations as well as the unallocated cost of some country organizations.

Glossary

Adjusted earnings per share are the basic earnings per share from continuing operations excluding incidentals in operating income, amortization of intangible assets and tax on these adjustments.

Comprehensive income is the change in equity during a period resulting from transactions and other events other than those changes

resulting from transactions with shareholders in their capacity as shareholders.

EBIT is operating income before incidentals.

EBIT margin is EBIT as percentage of revenue.

EBITDA is EBIT before depreciation and amortization and refers to EBITDA before incidentals.

EBITDA margin is EBITDA as percentage of revenue.

Emerging Europe: Central and Eastern Europe (excluding Austria), Baltic States and Turkey.

Incidentals are special charges and benefits, results on acquisitions and divestments, restructuring and impairment charges, and charges related to major legal, anti-trust, and environmental cases.

Invested capital is total assets (excluding cash and cash equivalents, investments in associates, the receivable from pension funds in an asset position, assets/liabilities held for sale) less current income tax payable, deferred tax liabilities and trade and other payables.

Mature markets comprise of Western Europe, the US, Canada, Japan and Oceania.

Moving average ROI is calculated as operating income of the last twelve months divided by average invested capital.

Net debt is defined as long-term borrowings plus short-term borrowings less cash and cash equivalents.

Operating income is defined in accordance with IFRS and includes the relevant incidental results.

Operating working capital is defined as the sum of inventories, trade receivables and trade payables of the total company. When expressed as a ratio, operating working capital is measured against four times last quarter revenue.

ROS% is operating income as percentage of revenue.

Safe Harbor Statement

This report contains statements which address such key issues as AkzoNobel's growth strategy, future financial results, market positions, product development, products in the pipeline and product approvals. Such statements should be carefully considered, and it should be understood that many factors could cause forecast and actual results to differ from these statements. These factors include, but are not limited to, price fluctuations, currency fluctuations, developments in raw material and personnel costs, pensions, physical and environmental risks, legal issues, and legislative, fiscal, and other regulatory measures. Stated competitive positions are based on management estimates supported by information provided by specialized external agencies. For a more comprehensive discussion of the risk factors affecting our business, please see our latest Annual Report.

Brands and trademarks

In this report, reference is made to brands and trademarks owned by, or licensed to, AkzoNobel. Unauthorized use of these is strictly prohibited.
