## AkzoNobel

\* In case of a demerger, shareholders effectively receive the proceeds as they would become shareholders of the Specialty Chemicals business as a separate listed company

AkzoNobel's color expertise was called upon to create a special gold custom coating for China's latest generation of high-speed trains. We supplied a bold new look for the sleek Fuxing CR400BF, which has been dubbed the Golden Phoenix (fuxing means rejuvenation).

### **Concluding remarks**

## AkzoNobel

Specialty Chemicals is expanding capacity of colloidal silica in Sweden. The expansion will help meet growing customer demand and strengthen the market leadership position. From delicate applications like filtrating beverages and polishing the chip inside your smartphone, to industrial things like hardening concrete, colloidal silica is a versatile product

## Outlook

Headwinds experienced during 2017, including higher raw material costs and adverse effects from foreign currency, are projected to continue in 2018, especially during the start of the year.

We anticipate ongoing positive developments for Decorative Paints in all regions, particularly Asia. Trends for Performance Coatings are expected to be positive for most segments and regions, while still challenging for Marine and Protective Coatings.
